THE HORSESHOE BRAND

The Horseshoe Brand on Boots, Shoes and Harness shows that they are the best quality. Goods marked with this brand cannot be bought from mail order houses or firms that buy only the cheap grades of Harness and boots, that look better than they really are. The Horseshoe Brand goods are guaranteed and the others are not. When buying Boots, Shoes or Harness see that the Horseshoe is stamped on them.

CARBON TRADING CO.

LITTLE ITEMS OF LOCAL INTEREST

Mr. and Mrs. Trepanier and family left Saturday for Quebec, where they will spend the next couple of months.

Mr. and Mrs. Greenhalgh left on Tuesday for a short visit in Lloydminster.

E. Morfitt of Carmangay, has taken a position in the drug store.

S. Carney and R. Barr motored to Crossfield on Monday, returning Tuesday.

A number of the Carbon people attended the Beiseker sports on Wednesday.

Dennis Wilson commenced work in the Carbon Bakery on Wednesday.

Myrtle Oliphant pupil of Mr. H. Birch was successful in passing the Toronto conservatory of music Examination with honors.

RESULTS OF COUNTRY SCHOOL EXAMINATIONS

The following are the results of the Lenox School term examinations:

Grade 6 to 7—E. Zeigler, Kate Zeigler, Oscar Gackle.

Grade 5 to 7—H. Zeigler, Ida Zeigler, Ida Kappes.

The year's high average puts them into grade 7 from 5.

Grade 4 to 5—H. Cork, M. Sember, M. Zeigler, J. Appleyard, G. Appleyard, H. Zeigler.

Grade 2 to 3—G. Sember, E. Kappes, R. Pallesen, L. Kappes.

Grade 1 to 2—Ben Zeigler, Bob Zeigler, John Zeigler A. Zeigler.

I.M.V. Brown, teacher.

The following are the results of the Humbolt School term examinations:

Grade 7 to 8—Arthur Forsch.

Grade 6 to 7—I. Forsch, Lydia Martin.

Grade 5 to 6—P. Martin, Viola Forsch.

Grade 4 to 5—C. Reid, E. Sailer M. Forsch.

Grade 3 to 4—F. Martin, Hilda Martin.

Grade 2 to 3—Lena Hwase.

To Grade 2, Sr.—Billy Cameron.
To Grade 2, Jr.—Winnie Offer.

Lorraine Farrell, teacher.

Gamble Items

Mrs. S. N. Wright, Bert, Caroline and Edith, motored to Banff on Monday. They plan to return on Friday.

Johnson and Ingraham Hart, accompanied by Hugh MacDonald and Alec Poxon, motored to Sylvan Lake Saturday. The three latter are attending the Tuxis camp there.

There are new thrills in this district as it is bee swarming time. Mr. Wright's bees swarmed a week ago and Mr. Hart's on Monday. Both swarms are safely hived.

Concluding a stay in Canada on their ranch near Kamloops, B. C., the Marquess and Marchioness of Exeter accompanied by Lady Winifred Cecil, sailed from Quebec recently on the Canadian Pacific steamship Minnedosa for England.

Swalwell

The Rev Dr. Dickson officiated at the Knox church Calgary when Miss Myrtle Stradee of Monitor and Mr Earl Tricker of Swalwell were united in marriage on Wednesday June 29th. Miss Thelma Foss, cousin of the bride, was bridesmaid and Mr. Alf Tricker brother of the bridesmaid was best man. The newly married couple are spending a short honeymoon at Monitor.

Mr. and Mrs. M. Huston have left by car for Consort where they are spending a few days visiting their people there.

Jubilee Celebration day was a quite day in Swalwell, nearly everyone migrating to distant points, there was something doing in the way of a celebration.

A very pleasing programme was given by the scholars in the school on Monday at which the parents and friends were invited.

All the streets in town are now graded, the Village council having availed themselves of the services of the big grading outfit working east and west of town

Another wedding of local interest during the last week is that of Miss Beatrice, R. N. who was the bride of Mr. Tom Davis of Calgary. The wedding took place at the St. Mary's Church with the Rev. Father Kilne officiating. The bride was attended by Mrs. De'Satge, matron at the Holy Cross Hospital, and Mr. Pat Moore acted as best man. The wedding took place on June 30th.

Miss Jean Davis stopped off for a 24 hour visit on her way home for the summer vacation.

We are glad to report Mrs. S. T. Tilley's arrival home after her very serious illness and operation at the General Hospital in Calgary, and trust she may continue to make good progress.

SEALED TENDERS will be received by the Board of Trustees of the Garret School District, up to July 15, for the laying of a new hardwood floor and the kalsomining of the School house. Specifications can be obtained from the secretary.

The lowest or any tender not necessarily accepted.

W. A. WOOD,
Sec.-Treas., Carbon, Alta.

SAD DROWNING-BELOW CARBON DAM

A very sad accident occurred on Monday evening about six o'clock, when Frank Williams, 11 year old son of Mr. and Mrs. Richard Williams of Drumheller, was accidentally drowned in the Knee Hill Creek at Carbon, just below the dam. Young Williams and three other children were swimming in the water and evidently the lad stepped into a deep hole and disappeared. The other children did not at first realize what had happened, and when they went for help the young lad had been in the water some time. He was brought to the surface and Dr. McFarlane was summoned and took charge of the patient, but nothing could be done to bring the child to life.

Mrs. Williams and two children were up from Drumheller visiting with Mr. and Mrs. Geo. Wise at the time of the accident, and till two years ago were residents of Carbon. Since then they have resided in Drumheller.

The deceased leaves a sorrowing mother, father and sister, Rosie, to mourn his loss.

Funeral services were held from the home of Geo. Wise on Wednesday afternoon, the Rev. J. Oakley officiating. Interment was made in the Carbon cemetery.

The pallbearers were Curtis Wiertz, Victor Gorden, Wm. Edwards and Gorden Ramsay.

APPLICATION FOR LEASE OF ROAD ALLOWANCE OR SURVEYED HIGHWAY

Notice is hereby given that The Council of The Village of Swalwell has made application to the Minister of Public Works, Edmonton, for a lease of the following road allowance or surveyed highway, Viz.

The untraveled road allowance forming part of the northern limits of the north half of Section 9 Township 30 Range 24 west of the 4th Meridian.

Any protest against the granting of the above mentioned lease must be forwarded to the Minister of Public Works, Edmonton within thirty days from the date of this notice.

Dated at Swalwell this 21st day of June.

HARRY R. LONGSTAFF,
Secretary Village of Swalwell

When it comes to wearing apparel, the flapper isn't in it.

Tests have proven that a woman can dress in forty-five seconds and a cat can swim if it has to.

Boy's don't care about keeping that school girl complexion.

That is the reason they brush the powder off their coats as soon as they get home.

Canadian tobacco has been awarded a silver medal for "outstanding excellence" at the International Tobacco Exhibition held at Olympia, London, England, according to word received by the Department of Agriculture.

Fifteen Austrian families are about to take up land in the Okanagan Valley, near Kelowna being the first group to take up land in British Columbia under the Canada Colonization Association, a subsidiary of the Canadian Pacific Colonization Department.

Canada leads all nations in increased trade since 1913 according to statistics compiled by the National Foreign Trade Council of New York. Canada's increase was 85 per cent, Australia coming next with 45 per cent and the United States third with 31 per cent.

The Provincial Game Commissioner of Alberta announces bounties to be paid on wolves killed — \$20 for the pelts of female timber wolves, \$10 for that of males, and \$2 for adult and pup prairie wolves taken before September 1st and July 1st, respectively.

Another collection of native Canadian animals has gone forward across the waters through the Canadian Pacific Express Company. It included, two bear cubs, two porcupine, two coyotes, prairie dogs and marmots, two great blue heron and a collection of Canada geese, destined for the zoo at Pretoria, South Africa.

One feature of the celebration of the 60th anniversary of Confederation at Vancouver, July 1-4, will be the official opening of the 1,100-foot new Canadian Pacific Railway pier "B-C" on the latter date. This is the second largest pier on the American continent and is said to be the only pier in the world built in such deep water.

Canada's so-called "Barren Lands" in the Far North have been under examination for the past two years by the Porsild brothers, graduates of the University of Copenhagen, in the employ of the Dominion Government, for the purpose of ascertaining the value of this vast territory for accommodating reindeer.

Here and There

Construction will be started shortly, it is announced, on the 2,400,000 bushel elevator to be erected by the Alberta Wheat Pool at Vancouver, and it is expected that the big plant will be ready to handle grain from the 1927 crop.

Twenty-three members of the Ohio Wesleyan Glee Club sailed recently on the Canadian Pacific steamship Montrose for England, where they will visit a short while before beginning a singing tour of the countries of central Europe to last about a month.

The Holy Land is to be officially represented at the World's Poultry Congress, it is announced. Dr. David Uri of the poultry experiment station in Palestine, will represent that country at the great international event to be held in Ottawa from July 27th to August 4th.

A new direct steamship service between Saint John and Havana, Cuba, will likely be inaugurated from the first of September, when the potato shipments start, if the New Brunswick Government and the shippers of the province back the project, said F. L. Estabrooke, of Sackville, just returned from a trip of enquiries in Cuba.

A bed which rocks its occupant to sleep has been invented by Sir Alfred Yarrow, British scientist. Sir Alfred, while travelling across Canada on the Imperial Limited some months ago, noticed that the slight sway of the train cured his insomnia. This fact resulted in his constructing the unusual bed which enables him to sleep soundly.

A new departure in the province was the recent formation of an association known as the Nova Scotia Chinchilla Rabbit Breeders' Association, at a meeting at Kentville, with F. W. Foster of Dayspring, president; Mrs. J. B. Barrett, of Avonport, vice-president, and G. E. Roberts, of Grand Pré, secretary. Pelts will be marketed through the English Fur Board.

Search for the missing French aviators, Nungesser and Coli has been resumed by two Pathe News and two New York Daily News men who arrived at the C.P.R. station in Montreal recently enroute to Chicoutimi. Three of the party will form a land expedition, while the fourth will fly into the Quebec woods from Grand'Mere. They will stay in until the mystery of the flares is cleared up.

B. Macdougall, former Saskatoon aviator and now a leading stunt flier in Los Angeles, has written asking if the citizens of Saskatoon will provide a plane to be entered in the flight from the Pacific coast to Hawaii, which he will fly. He offers Saskatoon backers half the prize money and half any other receipts, should he be successful. The President of the Star has announced that The Star is prepared to make a substantial contribution towards the \$15,000 required. The plane would be named the "City of Saskatoon."

APPLESAUCE

So many times a girl who thinks she has a date draws a prune.

Curiosity does not kill all cats; some of them thrive on it.

If exercise will eliminate fat,

how in the world does a woman get a double chin.

Visitor: So you have triplets in your house? Has your father names for them yet?

Small Boy: Yes, but I don't think any minister would baptize

them with what pa calls them.

The Judge: So your name's Joshua, eh? You're not the Joshua that commanded the sun, are you?

Eber Holden: Lor, no, Judge. Ah'm de man dat made de moon shine!

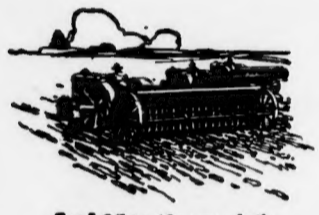

Raise Larger Crops and Make More Money

Plow 5 to 8 acres daily

Double disc 15 to 25 acres daily

Seed 25 to 40 acres daily

In crop production the Fordson farmer's advantages are sevenfold:

- First** —He prepares an ideal seed bed. Fordson speed and power allow thorough use of plow, disc, cultivator and harrow producing a splendid state of tilth in which young plants thrive heartily.
- Second** —He prepares as much land for field crops as he had planned.
- Third** —He gets his seeding done on time.
- Fourth** —He accomplishes the work with greater ease and convenience.
- Fifth** —He receives a larger yield from timely work well done.
- Sixth** —His cost is much lower because one man can do two or three times as much work.
- Seventh** —He makes more money.

In addition the Fordson farmer has ample power for such belt jobs as threshing, filling silos, baling hay, grinding grain, sawing wood, and many others.

Over 17,000 Fordson farmers in Canada enjoy these advantages.

Believes in Aviation Future

Exploration Has Succumbed to Modern Methods Says Amundsen

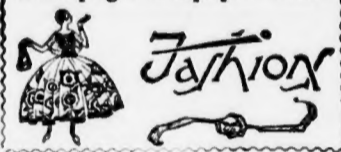

Even exploration, the oldest urge of mankind has succumbed to the expediency of modern methods of travel, and in aviation lies the future discovery of new lands declared Captain Roald Amundsen of polar fame before sailing from Vancouver for Japan.

For this reason Captain Amundsen has abandoned any plans for further exploration and will content himself for the present with re-telling of his exploits. His present journey to Japan is for the purpose of delivering a series of lectures in the principal Japanese centres.

"Exploring will all be done from the air in future," declared Captain Amundsen. "I am too old to take up flying and I do not intend to start anything which I cannot carry out myself. My trip on the Norge was a mistake. Commander Nobile was a flier, I am an explorer. We did not see things alike."

"My exploring days are now finished and I prefer to leave while they were at a zenith. I have been following trails since I was 15 and I am content to leave it to the younger generation. My travels from now on into the northern country will be with a gun and a rod," he said. He also stated he was particularly interested in the Northern part of Canada above Athabasca and he hoped to be able to traverse the trails in that part again.

An Attractive New Frock

Exceedingly graceful is the charming frock pictured here. The bodice is joined to the skirt having four flared pockets and there are long tight-fitting sleeves. Contrasting material may be used for the shaped band at the hips and the collar having buttons as the only adornment. No. 1606 is for misses and small women and is in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 3½ yards 39 inch, or 2½ yards 54 inch material. View A requires ½ yard additional 39-inch contrasting material. Price 29 cents the pattern.

The garments illustrated in our new Fashion Book will keep you "in step with fashion." They are advance styles for the home dressmaker, and the woman or girl who desires to wear garments dependable for taste, simplicity and economy will find her desires fulfilled in our new patterns. Each pattern envelope gives charts showing at a glance how to lay the pattern on material and where the different pieces are joined. Price of the book 19 cents the copy.

Miss Hortense Cartier, only surviving daughter of Sir George Etienne Cartier, one of the Fathers of Confederation, who came to Canada a few days ago as the guest of the White Star Line to attend the ceremonies in Canada in connection with the jubilee of Confederation.

Honors Canadian Soldiers

Mons Pays Tribute to Men Who Brought Relief to City

Heartfelt recognition of what the Canadian soldiers had done in capturing the city of Mons, where the final shot in the war was fired and the city restored to its freedom after 50 months of German occupation, was given by Burgomaster Maistriau, of Mons, at the unveiling of the plaque in commemoration of the historic entry of the Canadian corps into the city.

The Burgomaster replied on behalf of the city to the eloquent address of Hon. Rodolphe Lemieux, speaker of the Canadian House of Commons, and to tributes paid by others taking part in the ceremony.

Burgomaster Maistriau paid glowing praise to the heroism of the Canadians and spoke of the deep gratitude of the people of Mons for the relief they had brought to the city. As a special mark of recognition, the Burgomaster announced that the following had been made honorary citizens of Mons:

General Sir Henry E. Horne, Commander of the First Army in whose territory the Canadians operated; Lieut-General Sir Arthur Currie, commander of the Canadian corps; Major-General F. O. W. Loomis, in command of the Third Canadian Division, and Brig-General J. A. Clark, who was in command of the seventh Canadian Brigade, whose troops were the first to enter Mons. The latter had also been made a member of the Mons Bar, the Burgomaster said.

For Burns and Scalds.—Dr. Thomas' Electric Oil will take the fire out of a burn or scald. It should be at hand in every kitchen so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

Making Concrete Lighter

"Gassing" concrete to give it added lightness is a novel idea reported from Sweden. While the concrete, a mixture of sand, gravel, and cement, is still soft, gas is introduced into the mixture. This has the same effect on the concrete as yeast has on bread, filling it with small holes. The concrete produced is just as strong as the ordinary product, but much lighter.

RAMSAY MACDONALD "HOME AGAIN"

Picture shows Mr. Ramsay MacDonald, Britain's Labor leader, and his daughter Isabel, being welcomed by the Mayor of Southampton on the arrival at that port of the Cunard liner "Berengaria." In the group are also Arthur Henderson and F. O. Roberts.

SUNDAY SCHOOL LESSON

JUNE 26

LIFE AND LETTERS OF PETER

Golden Text, "Come ye after me, and I will make you fishers of men."—Matthew 4:19.

Reading: 1 Peter 5:1-11.

Devotional Reading: Isaiah 55:6-13.

A Review by Means of Allusions

Ascertain how many recognize each allusion as you read it. After a member of the class has explained the reference, ask a few questions about the lesson in which it occurs.

Self is the only prison that can ever bind the soul,
Love is the only angel which can bid the gates unroll,
And when he comes to call thee, arise and follow fast,
His way may lead through darkness, but it brings to light at last.
—Henry van Dyke.

And the voice which came from heaven we heard when we were with him on the holy mount.—Peter.

On the spire of the belfry tipped with a vane
Of metal, the friendly flames of the spring sun
Glanced like the tongues of fire be-held by
Apostles aforetime.—Longfellow.

You, Lord-Legate
And Cardinal-Deacon, have sat now to learn
That ev'n St. Peter in his time of fear
Deceived his master, ay, and thrice,
one Lord.—Tennyson.

I gave up all to follow thee—
Even like him who gave up his nets
To winds and waves of Galilee!
—Thomas Bailey Aldrich

Let all dear hearts with me rejoice, as
did the saints of old
When of the Lord's good angel the
rescued Peter told.—Whittier.

We shall be sifted till the strength
Of self-conceit be changed at length
To meekness.—Longfellow.

A photographer makes a sensitive plate, exposes to just the rays of light that he chooses, dips it into the proper solutions, and holds it up to the light to see if his picture is there. What else did this Great Teacher do on that day but hold up three souls to the light to find out if the reflection of the Son of God were fastened there.—Stuffer.

"In warring Germany I found professors spreading the idea that Germany is the rock selected by the Almighty God upon which to build His empire."

Your accent like St. Peter's would betray you,
Did not your yellow beard and blue eyes.—Longfellow.

We are inclined to obey man rather than God, to think more about what others will say than about how God will judge.

"You see the church can no longer say, like Peter, 'Silver and gold have I none,'" boasted Innocent the Fourth to Thomas Aquinas, and that great philosopher remarked in his turn, "Nor can she say, 'Rise up and walk.'"

Thou who hast thyself
Endured this fleshhood, knowing how
as a soaked
And sinking venture it can drag us
down
And drown us in the melancholy deep,
Sustain me that I walk these waves
Resisting!—Mrs. Browning.

And in the hereafter, angels may
Roll the stone from the grave away.
—Whittier.

Corns are caused by the pressure of tight boots, but no one need be troubled with them long when so simple a remedy as Holloway's Corn Remover is available.

"I was shocked to hear that Peter eloped with your wife. I always thought he was your best friend."
"He is, but he doesn't know it." —
[Toronto Goblin.

Experiments of more than 30 years have proven that Aluminum is the best container for tea, and paper the poorest. Red Rose Tea is now packed only in Aluminum, and every package is guaranteed to be in perfect condition. b

Life Of Early Canadian Settlers

Primitive Life of First Settlers in Upper Canada

In this jubilee year one may contrast the lot of the immigrant today with his predecessors in old Canada. After the U. E. Loyalists, who had their own troubles, the earliest settlers had a long voyage across the Atlantic in a sailing vessel, and travelled thence to their destination by the inland waterways or by stage. As they struck out into the wilderness even roads were few and far between. Schools, churches, doctors were non-existent or difficult of access. A good picture of early settlement in Upper Canada is given by the historian McMullen. He describes the settler going into the woods with no more worldly possessions than a gun, an axe and the clothes on his back.

"Thus lightly equipped, he took possession of his two hundred acres of closely-timbered forest land and commenced operations. The welkin rings again with the vigorous strokes as huge tree after tree is assailed and tumbled to earth; and the sun presently shines in upon the little clearing. The best of the logs are partially squared and serve to build a shanty; the remainder are given to the flames. Now the rich mold, the accumulation of centuries of decayed vegetation, is gathered into little hillocks, into which potatoes are dibbled. Indian corn is planted in another direction, and perhaps a little wheat. If married, the lonely couple struggle on in their forest oasis like the solitary traveller over the sands of Sahara or a boat adrift on the Atlantic. The nearest neighbor lives miles off, and when sickness comes they have to travel far through the forest to claim human sympathy. But fortunately our nature, with elastic temperament, adapts itself to circumstances. By and by the potatoes peep up, and the corn blades modestly show themselves around the charred maple stumps and girdled pines, and the prospect of the sufficiency of food gives consolation. As winter approaches, a deer now and then adds to the comforts of the solitary people. Such were the mass of the first settlers in Upper Canada." —London Adventurer.

For Frost Bites and Chilblains.—Chilblains come from undue exposure to slush and cold and frost-bite from the icy winds of winter. In the treatment of either an excellent preparation is Dr. Thomas' Electric Oil, as it counteracts the inflammation and relieves the pain. The action of the oil is prompt and its application is extremely simple.

New Type of Airplane

Invention of French Postman Operated by Compressed Air Motor

A French postman named Ernest Dole, of Lespilles, a little town near Avignon, France, who claims to have invented a new form of flying machine to be operated by a compressed air motor and six high-pressure air tubes which would permit instant elevation, placed a model of his invention on exhibition at the town there. Juxtaposed to the motor appears a novel turbine apparatus which takes in air to replace the air supply which the motor consumes, thereby dispensing with any need of fuel power.

The plane resembles the Santos Dumont model in form. The model shows two transmission pulleys and two propellers, one located over the bow of the machine and the other below midship.

Aside from the compressed air motor which is the most important feature of this invention, the postman's aeroplane distinguishes itself from other flying machines in being able to achieve vertical elevation, and the safety of the pilot is secured through transformation of the wings into parachutes. The inventor of the machine hopes to give it a trial soon at the airdrome in Lyons.

Misfortune often puts us wise to our own carelessness.

STEPS TO AVERT AT OUTBREAK OF WAR IN EUROPE

Geneva, Switzerland. — Statesmen attending the League of Nations council meeting here are reported increasingly convinced that the time has imperatively arrived to take preventive steps to avert an outbreak of war in Europe.

Fear of such an eventuality is mainly inspired by the reported attitude of Soviet Russia following the breaking of diplomatic relations by Great Britain and the assassination of the Soviet Minister to Poland. In Southern Europe another situation presents itself through the break of relations between Yugoslavia and Albania.

The Associated Press learns that Germany has been virtually brought over to the camp of those powers who favor warning Russia against continuance of her alleged propaganda abroad and terrorism at home.

If this warning is delivered jointly by the powers which is a possibility, it will not be worded as a menace to the Soviet system, but will be drafted from the viewpoint that Europe cannot risk another war and that the powers are united in the sense that any aggressor is the enemy of all.

Foreign Minister Stresemann of Germany is profoundly anxious to avoid any appearance of "forging a hostile ring of steel around Russia" and will presumably only promise Germany's support to a general anti-war movement.

Germany has a special national interest in preventing any armed outbreak between the European powers and Russia as she subscribed to the principle to the Locarno pact on the understanding that German soil would not be utilized for the passage of troops moving against Russia, but as a member of the League of Nations she would find herself greatly embarrassed in preventing the operation of military penalties against any state which refused arbitration and resorted to hostilities.

Will Hear Canadian Appeals

Six Cases Will Come Before Session of Privy Council

London. — Six Canadian appeals are on the list for the June sittings of the judicial committee of the privy council.

Among them is one of the Lascar Collieries, Ltd., Alberta, an appeal in which the minister of justice and Attorney-General of Canada is linked with others as respondent touching the jurisdiction of the board of railway commissioners for Canada over provincial railways.

There is also a reference by the Lieutenant-Governor of Nova Scotia, Hon. James Cranswick Tory, on questions affecting the constitution of the Nova Scotia legislative council. In this appeal the Nova Scotia government seeks authority either to increase the membership of the legislative council beyond the present statutory number of 21, or to dismiss the members of that body at pleasure, the government's aim being to abolish the council in either case.

Would Take Canadian Butter

Good Market in Britain for Saskatchewan Product

Regina. — That Saskatchewan may shortly be exporting a regular seasonal quantity of butter to the British market, was stated by E. P. Jupp, dairy products manager in London, England, for the New Zealand and Mercantile Agency Co., Ltd., during his visit here. Saskatchewan creameries have first-rate manufacturing plants and organizations, and, favored by legislation of an encouraging kind, should be able to ship much butter to the old land, Mr. Jupp declared. It was necessary, however, that the requirements of the British market be carefully studied.

St. Catharines, Ont. — Rev. Dr. Johnston and Dr. W. J. MacDonald left on a trip which will take them to the far reaches of the Slave River and its connections to the Arctic Ocean. They will detrain 300 miles from Edmonton and will travel more than 1,400 miles by water.

Home Makers Discuss Immigration Question

Resolution Disapproving Government Relief Brought Before Convention

Saskatoon. — Disapproval of the vigorous immigration policy of the government until the present unemployed are cared for and until those already brought to Canada in former years have been assimilated and stabilized, and opposition to the granting of special privileges to those outside Canada that are not granted to fellow citizens here, was the substance of a resolution endorsed by the United Farmers and presented by the Robsart Home Makers for discussion by the Home Makers clubs in annual session at Convocation Hall.

This resolution with the request for discussion was read by Miss De Lury in her annual report as convener of the Immigration committee. Much interest has been aroused on the subject in many of the clubs and the practical working out of the immigration policies in the province has stimulated this interest to such an extent that a regularly organized committee of Immigration be formed on the same basis as other standing committees with a provincial convener.

Honor Three Western Doctors

Receive Life Membership in Canadian Public Health Association

Regina. — Saskatchewan and former Saskatchewan doctors were honored by the Canadian Public Health Association at Toronto. Dr. M. M. Seymour, deputy minister of health for Saskatchewan had a life membership in the Association conferred in him at the annual meeting.

The following were added to the representatives of the Western provinces on the council: Dr. R. M. Bow, Alberta, and Dr. F. McGill, Saskatchewan.

George D. Porter, Toronto, was re-elected president of the Association for his third term and Dr. F. T. Turnbull, Vancouver, was elected one of the vice-presidents.

Attack Oath of Allegiance

Objection Raised by Republicans of Irish Free State

Dublin, Irish Free State. — The oath of allegiance to which the Republicans have strenuously objected is: "I do solemnly swear true faith and allegiance to the constitution of the Irish Free State, as by law established, and that I will be faithful to His Majesty, King George V., his heirs and successors by law in virtue of the common citizenship of Ireland with Great Britain and her adherence to and membership of the group of nations forming the British Commonwealth of Nations."

Urging Arbitration

Geneva, Switzerland. — Acceptance of obligatory arbitration by all governments was recommended by the International Council of Women, which urged the League of Nations to frame a general conciliation treaty, open to all states. The council also adopted a resolution that the next assembly of the league declare a war of aggression on international crime and adopt a treaty for the prohibition of aggressive war.

Flying to East Indies

Amsterdam, Netherlands. — Van Lear Black, chairman of the board of directors of the Baltimore Sun departed from the Schiphol aerodrome as a passenger in a plane he chartered for a flight to the East Indies. Before taking off he declared it was not a stunt trip and no record would be attempted. Mr. Black is accompanied by two pilots and his valet who has already flown with him some thousands of miles.

Orders Rent Reduction

Rome, Italy. — The cabinet has approved a decree of law forbidding increases in the present rent rates both of habitations and shops and fixing the maximum rates at four times those of 1914. The decree also ordered a fifteen per cent. reduction in the rent of apartments of less than six rooms, of ten per cent. for apartments less than nine rooms, but more than six, and reductions of from twenty per cent. for shops.

Miss Agnes MacPhail, M.P.

Miss MacPhail, who is proving to be one of the most capable members of the Canadian Parliament, will attend and address the Progressive Rally at the Regina Stadium on July 6th.

Penal Servitude for Life

Assassin of Soviet Minister to Warsaw Escapes Death Penalty

Warsaw. — Boris Kowceda, the 19-year-old youth who assassinated Peter Voikoff, Soviet minister at Warsaw, on June 7, was sentenced to penal servitude for life and the loss of all civil rights. The courts decided to recommend to the President of the Republic commutation of the sentence to 15 years servitude.

Kowceda admitted the killing at his brief trial, but declared he was not guilty of murder. He had merely taken vengeance for "what the Bolsheviks have done in Russia."

FINAL RESULTS OF ELECTIONS FOR IRISH COMMONS

Dublin. — With the three Independents to be elected by Dublin University, the final state of the parties in the new Dail Eireann will be as follows:

Government, including the Speaker automatically elected, 47.

Fianna Fail de Valera's party, 44.

Labor, 22.

Independents, 15.

Farmers, 11.

National League, 8.

Sinn Fein, 5.

Independent Republican, 1.

Total, 153.

The Clan Eireann, one of the numerous Free State political parties, has been extinguished by the general elections, and its founder, Prof. William Magennis, has lost his seat in the Dail. He represented the National University in Dublin and his only supporter in the last Dail, Patrick O'Malley, deputy Speaker, was defeated in Galway.

Post-Graduate Course For Canadian Students

Plan Sought to Have British Examiners Come to Dominion

Toronto. — In order to control the influx of graduates of Canadian medical colleges to the United States, where many of them go for post-graduate work, the Canadian Medical Council has under discussion and arrangement a scheme for the correlation of British and Canadian Medical education.

At present, cost of going to Britain to take post-graduate work places it beyond the reach of most eligibles. Under the plan which is expected to be in operation within a year, the graduate of a Canadian medical college will be able to take in Canada his primary examination for admission to the fellowship of the Royal College of Surgeons in England. British examiners will come out and set the examinations.

The primary examinations in physiology and anatomy will be conducted here, but the final examination in clinical subjects will still have to be taken in England. This is expected to result in large numbers of Canadian graduates taking up work here at home for the British examination.

Another activity in which the Canadian medical association is entering upon is the establishment in pioneer districts with the assistance of the Canadian Red Cross pioneer hospitals where the best medical services will be available to people in the hinterlands of Canada as modern and up to date as if they were in a city.

Cattle From Britain

First Shipment to Arrive After Embargo Restrictions Removed

Ottawa. — The first shipments of cattle and sheep to reach Canada from Great Britain since the embargo restrictions have been removed are now in the Dominion quarantine station at Lewis, Que., the federal authorities were notified recently. As a number of other permits have been issued further shipments are expected to arrive shortly.

Cattle will be kept in strict quarantine for 30 days after arrival, while the quarantine period for sheep is 30 days from the time of embarkation, and in order to prevent any possibility of the dissemination of infection should it be present in any of these imported animals, importers or other stockmen will not be permitted to enter the quarantine premises even for the purpose of looking their stock over.

Proposed Memorial

Kingston, Ont. — General A. E. Ross, M.P., for Kingston, has sent a circular to Conservative members in the country asking for subscriptions for the erection of a memorial to Sir John A. Macdonald in Ottawa, and with the balance to build a home for the Conservative leader in the capital.

Rough Rider From Australia

Sydney, Australia. — Allan McPhee, Australian champion rough rider, goes to Canada to contest the world's championship at the Calgary stampede in July.

SEEK INCREASE OF TARIFF ON CLOTH IMPORTS

Ottawa. — Imported shirts were torn between the fingers and imported blankets were pulled easily into pieces before the tariff board by P. J. Campbell, manufacturer of flannels, Abitibi, Ont., to show the nature of importations.

Mr. Campbell, in seeking an increased tariff, also sought to have standards established which would make it impossible to sell inferior fabrics for work shirts and flannels. Mr. Campbell produced imported shirts which had lost their color after a single washing and Canadian-made shirts still firm with their colors after two years of wear and wash by a farmer.

The Merchant Tailor Association brief objected to any increase in tariff on imported British woollens. It was claimed the British materials were superior in uniformity and finish, and that the pattern selection was greater than the Canadian.

R. P. Sparks presented the case for the Canadian Association of Garment Manufacturers, not requesting any specific change of duty but suggesting a spread of ten per cent. as a minimum between the raw material and the finished product. The hearing will continue.

Narrow Escape of Portuguese Aviators

Rescued by Fishing Boat When Plane Wrecked at Sea

Rio Janeiro, Brazil. — A three hours' battle with the elements as they held on to the floating wreckage of their plane is the story of Major Sarmiento Beires, Portuguese aviator, and the three men who were with him in his attempt to fly back to Lisbon by way of the United States. They left Para, Brazil, for Georgetown, British Guiana, on June 7, and after flying only 20 miles, a mishap compelled a forced landing at sea. When about to resume the journey a huge wave engulfed the plane, wrecking it.

The men held on tenaciously for three hours as a storm raged, great waves washing over them repeatedly.

When they had almost given up hope a fishing boat appeared and they were rescued with difficulty and taken to Para. The plane sank and only the log of the flight was saved.

Major Beires, who flew across the South Atlantic from the West African coast to an island off the Brazilian coast and thence to Brazil last March, now will return to Europe with his companions by steamer.

Developing Proper Spirit

Canadians Should Think of Canada All the Time

Ottawa. — "Until we develop a spirit of national consciousness Canada will never become a great country," was the statement of Howard Stutchbury, trade commissioner of Alberta, speaking here. "The people of the United States always think in terms of the United States. Over there they don't have 'made in the Empire' exhibitions — they don't have to, for the tendency to consume native products is inherent. That spirit should be encouraged in Canada, and until Canadians think of Canada all the time, Canada cannot become a great nation."

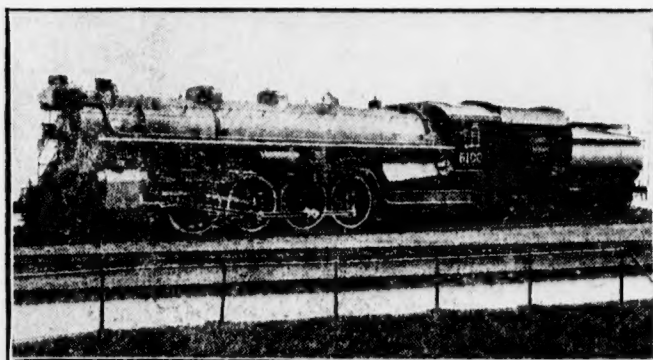

Agree on Tomato Prices

Kelowna, B.C. — Tomato growers have reached a satisfactory agreement with the canneries. The price to be paid to the growers will be \$26.50 per ton for Earliana, which variety will be grown at Kelowna, and \$18.50 for John Baer, which will form the main crop in some of the southern plantings. It is expected 1,200 acres will be planted to tomatoes in the Kelowna district.

Mrs. Churchill Injured

London. — Mrs. Spencer Churchill, wife of Winston Churchill, British Chancellor of the Exchequer, was injured in a motor accident in the Kensington district of London. She received a number of bruises and suffered from shock, but was progressing satisfactorily.

Canada's Newest Locomotive

The illustration depicts the new "6100" class locomotive, the latest production of the mechanical department of the Canadian National Railways. Forty of these "Northern Type" engines have been manufactured in Canadian plants for use of main line fast passenger and manifest freight service. They are 93 feet 10 1/4 inches over all. The tender has a capacity of 11,300 imperial gallons of water and 20 tons of coal. In working order the total weight of engine and tender is 638,000 pounds. Note the new position of the whistle, located on the left hand of the smoke box near the stack. This is to save the driver's ears. These engines are designed for power at speed and it is estimated that they can make 90 miles an hour with a heavy train.

Discovering Ways and Means Of Making Northern Hinterland An Integral Part Of Canada

Since Confederation the wilderness frontier of Canada has entirely shifted. Then the prairies, which now send a substantial representation to the House of Commons, were known only to Indians, fur traders, missionaries and a few explorers. The first task of the newly formed Canadian government was to arrange for a transcontinental railway to link up the infant settlement in British Columbia; and as astute men as Edward Blake argued earnestly against the folly of wasting money laying a railroad across such permanently uninhabitable areas as the southern parts of the present provinces of Manitoba, Saskatchewan and Alberta. As late as 1874 Sir William Butler wrote a forbidding description of the site of the present city of Prince Albert to prove that Europeans could never live there the year round.

The wealth and habitability of the southern prairies are now common knowledge. Today the push is north. Northern Quebec and Northern Ontario have attracted miners and farmers. Settlers are raising vegetables, grains, cattle and even fruits far north of Hazelton on the Skeena. Away to the north of Edmonton the fertile Peace River Valley is rewarding its pioneers. The push to the north is continent wide, and is on in earnest. We dare not predict what, by the end of the century, will be the population of those great central regions, which have all been proven valuable.

The Arctic and sub-Arctic plains alone remain a challenge to the pioneer. Already, thanks largely to Stefansson, this vast expanse is losing its mythological terrors. Here are one and one-half million square miles of grazing lands, with their native mooses, lichens, terns and 762 species of flowering plants. Yukon is yielding her gold; but in Alaska the annual catch of fish now far exceeds the products of the mines in value; and Canada's Arctic waters teem with fish.

The reindeer industry in Alaska has proved so profitable that Lomen & Co., alone ship annually 10,000 carcasses that bring a higher price than beef in the cities of the United States. Inspired by Stefansson, the Hudson's Bay Company has leased for raising reindeer the southern half of Baffin Island—an area the size of the British Isles. If the project of domesticating the musk-ox is carried out, a new source of food will be available that will put to profitable use great tracts of our Far North. Oil has been found between Fort Norman and the Arctic Circle.

What else the Far North will give, only time will tell. But the Canadian Polar regions are not as cold as Siberia, which is being voluntarily colonized. And as the climate of the Atlantic Coast once presented terrible difficulties to the French colonists, and yesterday that of the southern prairies seemed an insuperable obstacle to our fathers, so the belief, in which we were brought up, that the Far North was an impossible region of perpetual snow is fading in the light of scientific knowledge that the whole of Canada is habitable and productive. One of the greatest problems of the younger generation is to discover ways and means of making the north an integral part of Canada, instead of the hinterland it has been.

How He Knew

"You are a traveller, sir," said a passenger in a local train, "and perhaps you are familiar with Mud-wich?"

"Yes," said the other passenger, "I call there on every trip."

Glad to hear it, I've never been there. Which hotel would you advise me to stop at?

"The Majestic."

"Do you always stop there?"

"No, I've never stopped there, but I've been to all the others."—Bristol Evening News.

Fifty men and women students at the Homeopathic Medical College of New York, have volunteered to be stung by bees and bitten by spiders in an attempt to determine whether the venom can be put to some useful purpose.

Finishing Lambs for Market

Good Quality Alfalfa the Most Valuable Roughage

The process of finishing lambs for market has been receiving a good deal of attention at the Indian Head, Saskatchewan, Experimental Farm, and accounts of the investigations have been given in the reports of the superintendent. He stresses the fact that in selecting feeder lambs for finishing, good type, growthiness and thriftiness are the primary considerations. It must be remembered that lambs not docked and castrated are subject to heavy discount when marketed. For finishing lambs good quality alfalfa is the most valuable roughage. When it is not available, oat hay or hay from other cultivated grasses can be used to good advantage in conjunction with corn silage and roots. Oats are recognized as the standard grain for sheep, but a little barley may be added. It is generally considered good practice to give the feeder lambs a few weeks on good rape pasture or the run of a grain field after the crop has been removed, previous to putting them on the feed lot for fattening. For fattening, the roughage should be steady in quantity and quality, no more being fed than the lambs will clean up. The grain ration should start at 1/2 a pound per day and gradually increase to 1 1/2 pounds. The latest report of the superintendent may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

Imperial Solidarity

The vast majority of Canadians will be pleased to see Canada and the Motherland ranged side by side, not through unreasoning imperial loyalty, but because it is evident that in such matters the two Governments think along identical lines, deduce similar conclusions, and adopt like courses. That is proof of imperial solidarity stronger than the other unthinking sort.

Cantonese soldiers, looting an American mission, found some interesting looking white chests, which they broke open with rifle butts. The chests were bee hives, and the soldiers left hurriedly.

Excessive rains soaked the wool of a flock of sheep near Sedalia, O., and when the animals burrowed into haystacks timothy seed fell on their backs, germinated and sprouted.

A Frock of Youthful Smartness

The modish use of two materials this season is effectively shown in View A of this charming frock suitable for misses and small women. The pointed yoke, opening at the back, has a V neck and shaped collar and is joined to the dress employing the contrasting material for the inverted plaits at front and back. The long dart-fitted sleeves are finished with shaped cuffs, and a narrow belt fastens in front. View B is the same frock and is of one material, with the collar omitted and the edge of the V neck and short sleeves bound. No. 1543 is in sizes 16, 18 and 20 years. View A, size 18 (35 bust), requires 3 3/4 yards 29-inch material for dress, and 1 1/4 yards contrasting for plaits and trimming. View B, size 18 (35 bust), requires 3 3/4 yards 39-inch material, or 2 3/4 yards 54-inch. Price 20 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress-maker. Price of the book 19 cents the copy.

How Three Western Capitals Are Linked With The Early History Of Our Dominion

Fodder Crops in Saskatchewan

Conclusions Reached at Swift Current Experimental Farm

A deal of information regarding the growing of fodder crops in Saskatchewan is to be found in the report for last year the superintendent, Mr. J. G. Taggart, B.S.A., at Swift Current Current experimental station. A few of the conclusions that appear to have been reached and that are set forth are as follows: That with the exception of corn, annual fodder crops are more dependable when grown on fallow; that few crops equal oats in yield and usefulness; that annual hay crops are more certain to produce hay than grasses and legumes; that in normal seasons early maturing corn out-yields late maturing corn when comparing actual dry weights; that the selection of corn for earliness results in decrease of height in the plant, that it is not economical to harvest and use corn for feed, and that the only way in which it can be profitably used is to pasture it off with live stock such as hogs or sheep; that the thinner plantings of corn generally show a greater development of ear and a higher percentage of dry matter, but that when the planting is too thin the total yield of dry matter declines; that where weeds are a serious factor spring rye, oats or oats and peas are the best of the annual hay crops to grow; that there is no advantage in sowing millet early, but that on the contrary better yields are secured from moderately late seeding; that Grimm alfalfa is the hardiest of the alfalfa varieties as well as the highest yielding.

Saskatchewan Wheat Pool

Officials of the Saskatchewan Wheat Pool announced that at the end of May fifty per cent. of the wheat acreage in that province had been signed up for the five year period, ensuring the continuance of the pool until 1932. The wheat pools of Manitoba, Saskatchewan and Alberta have launched a united campaign to obtain renewal contracts.

The Cleveland police never let an offender escape once they get on his trail and have finally rounded up a motorist who has been using his 1906 license plates for the last 21 years.

Spectacles have been proscribed for a near-sighted baboon in the Cincinnati Zoo.

One of the things that links three of our western capitals with the days before Confederation is the interesting fact that each of them was at one time an important centre of the fur trade. Winnipeg covers the site of Fort Garry, Edmonton of Fort Edmonton and Victoria of Fort Victoria.

Winnipeg's association with the fur trade in fact goes much farther back. The old North West Company and the Hudson's Bay Company both had trading posts at the mouth of the Assiniboine, and as early as 1738 La Verendrye, the famous Canadian explorer, had Fort Rouge built within what is today the capital of Manitoba. Fort Edmonton was an important distributing point for the Hudson's Bay Company for its operations on the upper waters of the Saskatchewan, and north to the Athabaska and the Mackenzie River country. Similarly Fort Victoria was for years the headquarters of the Company's trade on the Pacific coast, after Fort Vancouver had been abandoned because of the settlement of the 49th parallel as the international boundary.

Things have changed considerably since the days of Fort Garry, Fort Edmonton and Fort Victoria. Those trading posts were occupied by a handful of white traders, with their half-breed boatmen and hunters; Indians roamed about the country that is now the four western provinces; countless herds of buffalo blackened the plains. Today busy modern cities cover the sites of the old trading posts; three great provincial buildings rise majestically from where Indian teepees or camp-fires once stood; thousands of square miles of wheat-fields have taken the place of the old grazing grounds of the buffalo; and two transcontinental railway systems follow the river systems that were once the thoroughfare of the fur trader.

It seems almost incredible, as one stands on the busy streets of these flourishing Canadian cities of today, that within the memory of men now living, such as the venerable Western Canadian poet Charles Mair, the only commerce that existed in these places was the trade in peltries, the only means of communication the canoe or horse or ox-cart, and the only government that of the famous Company of Adventurers of England trading into Hudson's Bay.

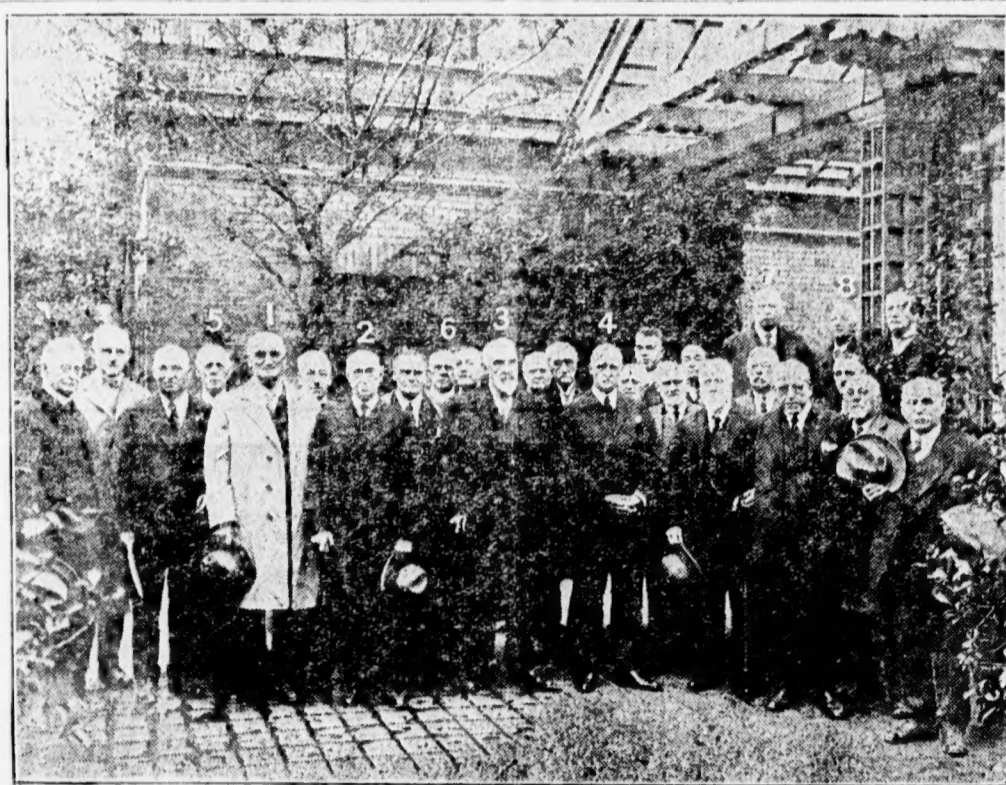

In the year of Confederation, Winnipeg was exactly five years of age; Manitoba had not yet been created out of the old Red River Settlement; to reach Eastern Canada it was necessary either to travel by canoe down the Red River to Lake Winnipeg, up the Winnipeg to the Lake of the Woods, from there by a series of small waterways to Lake Superior, and by the Great Lakes and the Ottawa river to Montreal, or to take an equally roundabout route through American territory. The Canadian Pacific Railway was still a thing of the future. Edmonton was still a trading post in 1867, and much more remote from Montreal than Dawson City is today. Victoria, like Winnipeg, was a baby community, although it had been through the hectic experience of the Cariboo gold rush. It would have been an exceptionally optimistic and far-seeing man who could have stood in any of these places in 1867 and predicted what they would become sixty years afterwards.

Canada's Population

According to the most recent estimate of the Canadian Government Bureau of Statistics, the population of Canada as at June 1, 1926, was 9,389,300. At the census taken in June, 1921, the population of the Dominion was 8,788,343. This latest estimate shows that the Province of Ontario has the largest population in the Dominion with 3,145,600; Quebec next with 2,561,800; Saskatchewan third with 821,000 and the other provinces as follows:—Manitoba, 639,000; Alberta, 607,000; British Columbia, 568,400; Nova Scotia, 540,000; New Brunswick, 407,200; Prince Edward Island, 87,000; Northwest Territories, 8,850; and Yukon Territory, 3,450.

"Haven't I seen your face somewhere?"

"Very likely—it goes about with me a good deal."

Old-Timers Meet After 40 Years

At the Hotel Vancouver in that city May 23, the Canadian Club gave a luncheon in honor of C.P.R. veterans at which Sir Esme Howard, British Ambassador to the United States was present. The occasion was the 40th anniversary of the arrival of the first passenger train over Canadian Pacific or any other lines into Vancouver

from the East. As indicated in the photograph they were: (1) P. A. Barnhart, conductor of the first train; (2) Peter Richter, driver of the first train; (3) George Munro, roadmaster, the only man now alive who was present at the driving of the first and last spikes in the construction of the Canadian Pacific Railway; (4) Sir

Esme Howard; (5) Jonathan Rogers, a passenger on the first train; (6) T. E. Barnett, first locomotive fireman; (7) W. H. Evans, the engineer who brought the first passenger train into Port Moody 41 years ago next month; and (8) H. T. Devine, official photographer of the arrival of the first train.

CHAPTER II.—Continued

"Get along with you, Anna," said Maggie soothingly; "you're crazy. Be thankful you have a roof over your head and good money cents' every month; and I'd advise you to stow all that wild talk or you'll get canned."

"Sure, that's a threat—shut your mouth or lose your job. We're slaves, every one of us. And you're one, too, but you love your chains." Anna was not to be appeased.

"Well, slave or no slave, will you meet the girl at the station?"

"No," said Anna. "I only recognize the claims of the Union. This girl is a scab so far as I am concerned. Your religious stuff doesn't go with me—it's soothing syrup, that's all. This is war, Maggie; we might as well name it, it's war. Now go, and tell on me if you want to."

Maggie Kenny, looking after the head waitress as she swept from the room, shook her head. "That's the devil's own talk," she said, "and there's no sense in it. Well, she needn't go to the train; I can get Mrs. Spencer herself to give me a hand with the dinner, and it's herself that can do it well, and will make no complaint of it, either. Slave owner she may be, but it's a grand woman she is, anyway."

Mrs. Spencer, when appealed to by her old friend and cook, readily agreed to cook the dinner. She had planned to go to a Tea at the Rectory to raise money for the Chinese, but she would send her dollar instead; and, indeed, she confided to Maggie it was grand to get her hands into the pie crust again, and maybe it was just as good to do a kind turn for a Finn girl coming into the country as for a Chinese, across the sea. The problem of the new Finn girl did not bother her at all. "Any girl that will wash dishes and scrub floors can always find a place, and if she's civil and clean and honest she'll get on, and," added Mrs. Spencer, "we can do with another now the Spring is here and we'll be for turning out the bedrooms."

When Margaret Kenny got off the Broadway car opposite the station a

crowd obstructed the traffic, gathering, knotting, and swelling, overflowing into the street. Policemen on horseback shouted, whistles blew, impatient automobile horns gave back derisive answers, and every moment the crowds grew denser, Maggie, remembering her mission, kept on the edge of the whirlpool, wondering what was causing all the excitement. In a lull in the commotion a man's voice fell on her ear, a hoarse voice, rough with shouting. The words were strangely familiar.

"Wage slaves, when will you wake up. The ruling classes, the owners, bring us here to do the rough and dirty work, pitting us one against the other to get their work done cheap. . . . Nothing to lose but our chains! . . . they send their paid police to scatter us. But the day will come."

Maggie turned away. This, then, was the place where Anna Milander was getting her education; and too bad it was, for Anna was a smart girl. As Maggie made her way through the crowd she came suddenly upon Anna; hardly recognizing her, for she wore an old cape and a heavy black veil. As Maggie jostled against her in the crowd her cape was brushed back, revealing a heavy stone in her hand.

"Cut that," whispered Maggie in her ear. "Don't be a fool, Anna. Do you want to go jail? Remember there's law in Canada."

"Law for the rich," sneered Anna. "none for the poor only what we make ourselves, and you're not helping us!"

A movement in the crowd swept Maggie on before she could say another word. She hurried into the station and saw that the big clock above the stairway pointed to the hour of the arrival of the train, and already the two living banks were forming in readiness for that troubled and palpitating stream which would come surging through the iron gates below.

"It's queer to be livin' in a country where the whole world come to see us," Maggie thought to herself when two Hindus with their lightly draped head-dresses walked haughtily by, followed by a colored man and woman with their little girl held by the hand.

"I'm glad I'm white," said Maggie to herself; "a white skin may be harder to keep clean, but it's worth the trouble . . . and even the poor child is as black as a boot,—that doesn't seem fair—but that's God's business and not mine, and I'm glad. Gosh! I hope Katie hasn't landed a lemon on me."

"A red-haired girl in a green tam"—that's not much to go by—there's ten thousand shades of red hair—and every girl these days wears a tam—sloppy, lop-eared things they are, too. They surged past her, women with shawls over their heads and endless troops of children, uniform only in weariness and muzziness. Maggie's tidy soul longed for oceans of soapy water and mountains of soft towels, and racks of clothes and troops of ministering angels with their sleeves rolled up, to help her. Absorbed in her gigantic plans she forgot her errand, rousing with a start when a voice beside her said, "Maggie Kenny." She looked around to see who had spoken and found beside her a tall young girl with soft brown eyes, red hair, and wearing a green tam.

"Maggie Kenny?" she said again, with a note of enquiry at the end, and an unmistakably foreign accent.

Maggie took her hand impulsively. "You're a smart thing," she said, forgetting that the girl could not understand; "how did you know me?"

Helmi had a photograph in her hand, an old one taken years before, when bangs were worn laid on straight and plastered down appar-

ently with shoe polish. A stern to boggan-slide of a hat, stiff and unrelenting, sat on Maggie's head like a helmet of mail, and the frozen look, which even the smallest kodak could inspire, was in her eye.

"Say, kid, you're smart!" cried Maggie in admiration. "I wouldn't know that myself."

Helmi laughed, showing a row of shining white teeth; she knew she was being praised.

She touched the photo and then pointed to Maggie's eyes.

"You'll do," said Maggie approvingly. "Kate Kenny didn't hand me a lemon this time."

The head waitress of the Yale Hotel was absent; lawfully detained, too. Indeed, at that moment that the delicious odor of roast beef, gravy, fried onions and creamed cauliflower was floating into the dining room from the kitchen table, where Mrs. Spencer, in a bungalow apron, carved and "dished," at that very moment Miss Anna Milander was locked in a cell at the central police station, charged with having maliciously and with intent to hurt hurled a stone at a policeman. Anna did not deny the charge; she was well pleased with her afternoon's work. She had struck a blow in Freedom's cause. It was all rather vague in Anna's mind. She was rather favorably disposed toward policemen as a class, but having joined the Union she was determined to become "class conscious." Policemen were enemies; so were employers; every one was an enemy except members of the Union. So Anna, having a clear program in her head, sat on her narrow bed in a warm cell, well content. Her picture would be in the paper; she would be praised by the speakers. She had risen from the dull, gray, dusty depths of obscurity, which the speaker called the base of the economic pyramid, and in the interests of her comrades in the submerged strata had heaved an honest rock. More than that, it had gone unerringly to the mark, and the pride of achievement burned in Anna's heart. In the fulness of her contentment she sang:—

"The banker calls it interest, and winks the other eye;
The merchant calls it profit, and heaves a joyful sigh;
The landlord calls it rentals, and he puts it in his bag;
The good old honest burglar—he just calls it swag."

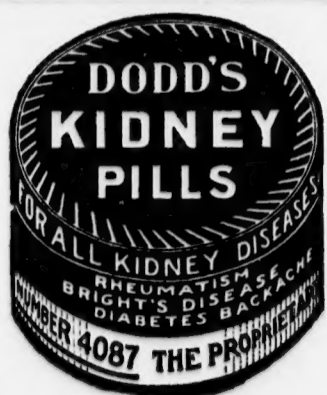

Though not related, Helmi and Anna bore the same name and resembled each other in features and coloring—the same creamy skin, reddish hair, brown eyes and general type. But at the moment they were widely different in appearance owing to the different styles of dress. Helmi wore a coarse shirt, a print blouse, with leather belt, heavily soled boots and home knitted stockings. Anna having been two years in Canada, had already acquired "style." She wore a narrow skirt, slit at the side, showing a flare of crimson petticoat, with a knife pleated edge; a belted coat, a red Windsor tie, and silk stockings always. The thought of having worn cotton stockings when she arrived in Canada gave her a smothered feeling now—they were the brand of servitude. "Bandages," she scornfully called them.

(To Be Continued)

What Russia Owes

Private British investors have claims against the Russian Soviet Government amounting to £510,000,000, and Russia's war debt to Britain is about £765,000,000—more than \$6,000,000,000 altogether. Russian indebtedness to France is quite as great. Russians appear to be past-masters in the art of the golden touch.

There are 2,130,000 licensed radio listeners in England; 1,337,122 in Germany; 238,000 in Sweden and 114,492 in Denmark.

**Says Prison Reforms Carried to Extreme**

Jails as Comfortable as Hotels Says Chief of Detectives in Quebec

Asserting that criminals of Canada and the United States no longer fear prison terms, George S. Rioux, chief of detectives in Quebec, rapped "mollycoddling" of criminals in a paper read at the convention of police chiefs in Windsor.

Rioux went on to say that prison reforms had been carried to a ridiculous extreme, and that many prisons now contain comforts not to be found in homes.

"The crook gets a better 'break' than victims of his violence," the Quebec chief detective said. "He is let loose on society after his sentence is completed, and the worst that happens to him when he outrages society again is that he returns to a place that is as comfortable as a hotel."

Saying that records prove that 70 per cent. of the criminals who have been convicted three times or more go back to their crooked devices when they are freed, Detective Rioux declared that no amount of sentimentalism or "sob stuff" is going to save the misfits of the world.

Refuses to Pay Fees

Reason Elevation of Lord Byng Has Not Been Gazetted

The viscountcy conferred on Lord Byng in October last on his retirement from the governorship of Canada, has not yet been gazetted and the delay is believed to be due to the high cost of fees for gazetzing a peerage or elevation therein, which Lord Byng refuses to pay. This runs anything between £330 and £730, according to the grade. Lord Byng is following the example of other soldiers who received honors in recognition of their war services in declining to pay for his elevation.

A GREAT PUZZLE TO CAREFUL PARENTS

One of the greatest puzzles to the careful parent is to know just what medicine to give the little ones. When the child falls ill with gripping pains; is seized with cold or fever, refuses food or vomits what he has taken, when he cries a great deal and cannot get the sleep so necessary to the growing child, the parent is in a quandary. What is to be done on such occasions? As often as not there is not a suitable medicine in the house. The puzzle is what to give him to set him right quickly. It is to meet such emergencies that Baby's Own Tablets were designed. These pleasant little Tablets quickly reduce fever, break up colds, relieve constipation and indigestion and allay teething pains. They quiet the nerves and promote restful health-restoring sleep. They are guaranteed absolutely harmless and safe for even the youngest and most delicate baby.

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

First Electric Street Car

First Electric Car in the World Operated at St. Catharines, Ont.

George E. Patterson, builder of the first electric car operated in the world, died recently in Pasadena, Calif. In 1874 he established a carriage building business in St. Catharines, Ont., and later constructed street cars, the first being known as Patterson and Corbin. It was one of his street cars, converted into an electric car, that was operated in 1887 between St. Catharines and Thorold. Five years ago he retired from active business at the age of 83.

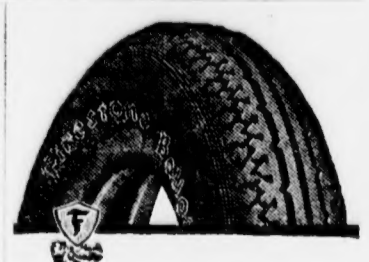

Record of War Service

The devotion of the Prussian "steel helmets" to the Hohenzollerns is really very hard to understand. The family's record of war services is a very poor one. The Kaiser ran away. The Crown Prince earned the reputation of a gay Lothario. Ethel stole furniture from the country houses of private citizens. — London Sunday Pictorial.

In the little town of Lyme Centre, N.H., with a population of 900, two in every hundred are over 80 years of age. Thirty residents are between 70 and 80.

Among those who didn't see the big police parade was the man who robbed a store while it was taking place.

Minard's Liniment is reliable.

**Extra Mileage at No Extra Cost**

Gum-Dipping is an exclusive Firestone process.

It insulates and impregnates every strand of every cord with rubber. Internal friction and heat are reduced to a minimum—the side walls are greatly strengthened. Firestone Full-Size Balloons absorb road irregularities—making driving easier and riding more comfortable.

Firestone Dealers are in a position to save you money and serve you better. See your nearest dealer to-day.

Little Helps For This Week

Vouchsafe, O Lord, to keep us this day without sin. — Te Deum.

Dear Lord, Thou bringest back the morn;

Thy children wake; Thy children pray;

Oh! make our souls divinely yearn. Pour Thy best beauty on the day.

Lend our slow feet that speed of Thine;

Our busy hands from evil stay; Lord, help us still to tasks divine.

Still keep us in the heavenly way. The weaklings plead; the sinners pray;

But, Lord, Thy grace exceeds our sin; We cannot ask too bright a day.

Too much of Thee we cannot win. — Thomas Hornblower Gill.

Let it be our happiness this day to add to the happiness of those around us, to comfort some sorrow, to relieve some want, to add some strength to our neighbor's virtue.

William Ellery Channing

Ease sunburn with Minard's Liniment.

Lived 30,000,000 Years Ago

One of the world's largest dinosaurs (Tornieria), which died about 30,000,000 years ago, is to be put on its legs again at the Natural History Museum, South Kensington. The Tornieria lived in the estuaries of rivers, laid eggs, and ate floating vegetation. It was about fifty feet long and thirty feet high, and weighed something like ten tons. Its bones were found in Tanganyika.

Eczema Covered Entire Body Cuticura Heals

"As far back as I can remember I had eczema. Practically my entire body was covered with it. It broke out in a fine rash which as I grew older developed into pimples and blisters. As a child I used to scratch it until it would bleed, and the burning and smarting were terrible. My face was a sight and I was kept home from school. I was kept awake at night and the torture was terrible."

"I sent for a free sample of Cuticura Soap and Ointment and after using it I got relief. I purchased more and in three months I was completely healed." (Signed) Miss Edith E. Hunter, R. R. 3, Brockville, Ont.

Keep your skin clear by using Cuticura Soap, Ointment and Talcum for daily toilet purposes. Touch pimples and itching, if any, with Cuticura Ointment, bathe with Cuticura Soap and hot water.

Sample Each Free by Mail. Address: Canadian Depot, "Cuticura Ltd., Montreal." Price: Soap 25c, Ointment 25c and 50c, Talcum 25c. Cuticura Shaving Stick 25c.

EXPECTANT MOTHERS

Read Mrs. Menard's Letter. Her Experience May Help

Chatham, Ontario.—"I want to tell you how much good your medicine has done me. Before my baby came I felt so weak and run-down that I could hardly do my work. My head ached continually and I was so discouraged that I could cry from morning till night. I had another baby just one year and a half old and it gave me a lot to do. So I thought I would try Lydia E. Pinkham's Vegetable Compound, as I had read so much about it in the little books. I found a difference right away as my head was relieved and my tired feelings gone. My sister had been doing my washing and she continued doing it, as she said it might set me back if I started to do it again. It sure did help me and I had taken just two bottles when my baby came. He is a fine big boy, now nearly five months old. I am taking your medicine again and I am able to do my work all by myself now. I always recommend the Vegetable Compound to women, and especially to expectant mothers, as I believe they need help at those times."

Mrs. OLIVER MENARD, 24 Harvey St., Chatham, Ontario.

Built for Endurance

BEHIND the beauty of Chevrolet there is
an abundance of strength and stamina,
just as there is a great store of surplus power.
The rugged channel steel frame, the husky
banjo-type rear axle, the powerful valve-in-
head engine and every detail of construction
combine to defy the ravages of wear and
tear, of hills and ruts, of mud and sand, of
extremes of climate and of hard, continuous
usage.
As Chevrolet has been designed for beauty,
powered for performance, planned for
economy—so Chevrolet has been BUILT
FOR ENDURANCE.
And this—the most Beautiful, the most
Powerful and the most rugged Chevrolet in

Chevrolet History—is selling at new, low
prices, the lowest for which Chevrolet has
ever been sold in Canada.
